## 4 Golf Courses You Can Eat

You're right – the notion of an “edible golf course” seems insane.

And yet, there are a few layouts around the world that stake a more or less legitimate claim to such a title.

Forget farm-to-table... these courses are farm-to-fairway:

### **Irie Fields Golf Club – Kittitian Hill, St. Kitts**

Irie Fields Golf Course at Kittitian Hill is not only highly edible for four-legged creatures, but its fairway-neighboring trees are full of fruit awaiting human consumption. (Kittitian Hill/Belle Mont Farms)

If you happen to have heard the phrase “edible golf course” recently, it’s because of this Ian Woosnam design, located at Belle Mont Farm on Kittitian Hill on the tiny Caribbean island of St. Kitts, in the British West Indies. It is the self-proclaimed “Most edible golf course in the world,” partly due to the fact that the maintenance crew uses zero fertilizer or pesticides in the preparation of the turf and uses a stingy irrigation system. But golfers are not keep on eating grass, after all, so the true “edibility” of Irie Fields comes from the numerous species of fruit trees that dot the property. Depending on the time of year when you visit, your caddie will advise you not only on how to play the course, but which fruits are in season as well.
